SUMMARY

Recently graduated from sri siddhartha institute of business management college with a degree in bachelor's of computer application and hands-on experience in programming languages and full stack web development and seeking to leverage my content creation and research skills to fill the role of applicant at your company.

EDUCATION

Sri Siddhartha Institute Of Technology

Bachelors of Computer Application in Computer Science

Sept 2021 - Aug 2024

CGPA: 8.2/10

Jnana Sampada Pu College

Senior Secondary (Class XII)

Jun 2020 - Jul 2021

Percentage: 67.6

Stella Maris High School

Secondary (Class X)

Mar 2018 - Apr 2019

Percentage: 71.84

PROJECTS

MERN Stack E-Commerce Website

- Utilized the MERN stack (MongoDB, Express.js, React.js, Node.js) to design and implement a dynamic, responsive web application, focusing on both frontend and backend development for optimal user experience and performance.
- Built RESTful APIs with Express.js to manage server-side logic, integrated MongoDB for seamless data storage, and ensured real-time data synchronization across the application for efficient user interaction.
- Interactive and scalable user interfaces using React.js, and optimizing performance through lazy loading and code splitting for improved site responsiveness and load time.

Portfolio Personal Web Project

- Personal portfolio website showcasing skills, projects, and achievements using HTML, CSS, BOOTSTRAP, and JavaScript..
- Designed and developed a visually appealing website deployed on Infinityfree.
- Managed project files using version control for collaboration and tracking changes.

Communicating Android Application

- Integrated secure user authentication using Firebase Authentication and ensured end-to-end encryption for message data to protect user privacy and enhance communication security.
- Created an intuitive and responsive UI using Android's XML layouts and Material Design principles, offering a seamless and engaging user experience across various screen sizes and devices.
- Utilized Firebase Cloud Messaging for push notifications and Firebase Firestore for fast and efficient real-time data synchronization, ensuring smooth performance even with high volumes of users and messages.

Human Health System

- Developed features for real-time data processing and visual reporting, enabling users to monitor health trends over time and receive insights on their wellness status, improving decision-making for health management.
- Created a user-friendly interface with responsive design to ensure ease of use across multiple devices, improving user engagement, and making health tracking accessible to a wide audience.
- Built features for real-time health data monitoring, incorporating automatic alerts for abnormal readings (e.g., blood pressure, heart rate), helping users take immediate action in case of health risks.

CERTIFICATIONS

- Python** Certified in Python by **Sololearn**.
- CSS** Certified in Cascading style Sheet by **Hackerrank**

SKILLS

C++, Java, Python, HTML, CSS, JavaScript, React.js, Node.js, MongoDB, Firebase, SQL, Git, SEO Optimization, Microsoft 360 Tools, Video Editing, Logo Designing, Content Creation, Teamwork, Leadership, Public Speaking

RELEVANT COURSEWORK

Data Structures, Algorithm, Database Management System, Object Oriented Programming, MySQL, Machine Learning, Artificial Intelligence, Natural Language Processing

ACHIVEMENTS

- Awarded Runner up in Vasista Esport game on campus
- Developed a personal website and hosted in the infinityfree.
- Participated in coding competitions by sololearn and hackerranks demonstrating problem solving skills.
- Developed proficiency in mern stack web development implementing these skills in real-world projects.

INTERESTS

- Passionate about latest video games.
- Regular participation in outdoor activities such as hiking and traveling.
